The 9 times table trick

There's a great trick for recalling the 9 times table which some children really enjoy:

To find 4×9 :

1. Hold out both hands in front of you.

2. To find 4×9 , count in 4 fingers from the left, and hold down this finger.

3. Count all the fingers before the one that's held down – 3. This is first number in your answer.

4. Count all the fingers after the one that's held down – 6. This is the last number of your answer.

So the answer to 4×9 is 36.

And it works for all the 9 times table up to 10×9 . Give it a go!
