

St Mary's Church of England Primary School

Geography Curriculum Progression Document

(From Term 4 2025)

*“Through the loving example of Jesus Christ we strive to provide opportunities for all members of our **diverse** school community to **flourish** within a **caring, aspirational, spiritual** and **inclusive** environment. We aim to create **successful learners, confident individuals** and **responsible citizens** ready to take the next steps in life”*

Peace

Friendship

Respect

Trust

Perseverance

Geography Curriculum Intent, Implementation and Impact

Intent

At St Mary's Church of England Primary School we follow the Kapow Primary Geography Scheme. We aim to inspire pupils to become curious and explorative thinkers with a diverse knowledge of the world; to think like geographers. Our Geography teaching promotes children's **spiritual**, moral, social and cultural development, allowing them to become **successful** geographers.

Geography is, by nature, an investigative subject, which develops an understanding of concepts, knowledge and skills. We seek to inspire in children a curiosity and fascination about the world and its people which will remain with them for the rest of their lives; to promote the children's interest and understanding of **diverse** places, people, resources and natural and human environments, together with a deep understanding of the Earth's key physical and human processes.

We want pupils to develop the confidence to question and observe places, measure and record necessary data in various ways, and analyse and present their findings. Through our scheme of work, we aim to build an awareness of how Geography shapes our lives at multiple scales and over time. We hope to encourage pupils to become **responsible**, active and **caring** citizens who will have the skills to contribute to and improve the world around them.

Our scheme encourages:

- A strong focus on developing both geographical skills and knowledge.
- Critical thinking, with the ability to ask perceptive questions and explain and analyse evidence.
- The development of fieldwork skills across each year group.
- A deep interest and knowledge of pupils' locality and how it differs from other areas of the world.
- A growing understanding of geographical concepts, terms and vocabulary. Kapow Primary's Geography scheme of work enables pupils to meet the end of key stage attainment targets in the National curriculum. The aims also align with those in the National curriculum. For EYFS, the activities allow pupils to work towards the 'Understanding the world' Development matters statements and Early learning goals, while also covering foundational knowledge that will support them in their further geography learning in Key stage 1.

Implementation

At St Mary's, we follow the Kapow Primary Geography Scheme.

The National curriculum organises the Geography attainment targets under four subheadings or strands:

- Locational knowledge
- Place knowledge
- Human and physical geography
- Geographical skills and fieldwork

Kapow Primary's Geography scheme has a clear progression of skills and knowledge within these four strands across each year group. Our Progression of skills and knowledge shows the skills taught within each year group and how these develop to ensure that attainment targets are securely met by the end of each key stage.

Geographical key concepts are woven across all units rather than being taught discretely as seen in the Progression of key geographical concepts. Our National curriculum coverage document shows which of our units cover each of the National curriculum attainment targets as well as each of the four strands in Key stage 1 and 2.

The document also reflects which Development matters statements and Early learning goals are met in each activity within EYFS.

The Kapow Primary scheme is a spiral curriculum, with essential knowledge and skills revisited with increasing complexity, allowing pupils to revise and build on their previous learning. Locational knowledge, in particular, will be reviewed in each unit to coincide with our belief that this will consolidate children's understanding of key concepts, such as scale and place, in Geography.

- Geography Display: Each class has a display which includes key knowledge linked to the class topic.
- Provision in EYFS: Children are given a secure grounding in the Prime Areas of learning, ensuring they have a good foundation on which to build through the specific areas, including Understanding the World. Areas of provision are enhanced to ensure vocabulary understanding and extension, and develop understanding of their local area.

Cross-curricular links are included throughout each unit, allowing children to make connections and apply their Geography skills to other areas of learning. Our enquiry questions form the basis for our Key stage 1 and 2 units, meaning that pupils gain a solid understanding of geographical knowledge and skills by applying them to answer enquiry questions. We have designed these questions to be open-ended with no preconceived answers and therefore they are genuinely purposeful and engage pupils in generating a real change. In attempting to answer them, children learn how to collect, interpret and represent data using geographical methodologies and make informed decisions by applying their geographical knowledge.

Each unit contains elements of geographical skills and fieldwork to ensure that fieldwork skills are practised as often as possible. Kapow Primary units follow an enquiry cycle that maps out the fieldwork process of question, observe, measure, record, and present, to reflect the elements mentioned in the National curriculum. This ensures children will learn how to decide on an area of enquiry, plan to measure data using a range of methods, capture the data and present it to a range of appropriate stakeholders in various formats.

Fieldwork includes smaller opportunities on the school grounds to larger-scale visits to investigate physical and human features. Developing fieldwork skills within the school environment and revisiting them in multiple units enables pupils to consolidate their understanding of various methods. It also gives children the confidence to evaluate methodologies without always having to leave the school grounds and do so within the confines of a familiar place. This makes fieldwork regular and accessible while giving children a thorough understanding of their locality, providing a solid foundation when comparing it with other places.

Lessons incorporate various teaching strategies from independent tasks to paired and group work, including practical hands-on, computer-based and collaborative tasks. This variety means that lessons are engaging and appeal to those with a variety of learning styles. Each lesson provides guidance for teachers on how to adapt their teaching to ensure that all pupils can access learning, and opportunities to stretch pupils' learning are also available if required. Knowledge organisers for each unit support pupils in building a foundation of factual knowledge by encouraging recall of key facts and vocabulary,

Strong subject knowledge is vital for staff to deliver a highly effective and robust Geography curriculum. Each unit of lessons includes multiple teacher videos to develop subject knowledge and support CPD. Kapow Primary has been created with the understanding that many teachers do not feel confident delivering the full Geography curriculum, and every effort has been made to ensure that they feel supported to deliver lessons of a high standard that ensure pupil progression.

Impact

An enquiry-based approach to learning will allow teachers to assess children against the National curriculum expectations for Geography. The impact of Kapow Primary's scheme can be constantly monitored through both formative and summative assessment opportunities.

Each lesson includes guidance to support teachers in assessing pupils against the learning objectives. Furthermore, each unit has a unit quiz and knowledge catcher, which can be used at the start or end of the unit to assess children's understanding. Opportunities for children to present their findings using their geographical skills will also form part of the assessment process in each unit.

After implementing Kapow Primary Geography, pupils should leave school equipped with a range of skills and knowledge to enable them to study Geography with confidence at Key stage 3. We hope to shape children into curious and inspired geographers with respect and appreciation for the world around them alongside an understanding of the interconnection between the human and the physical.

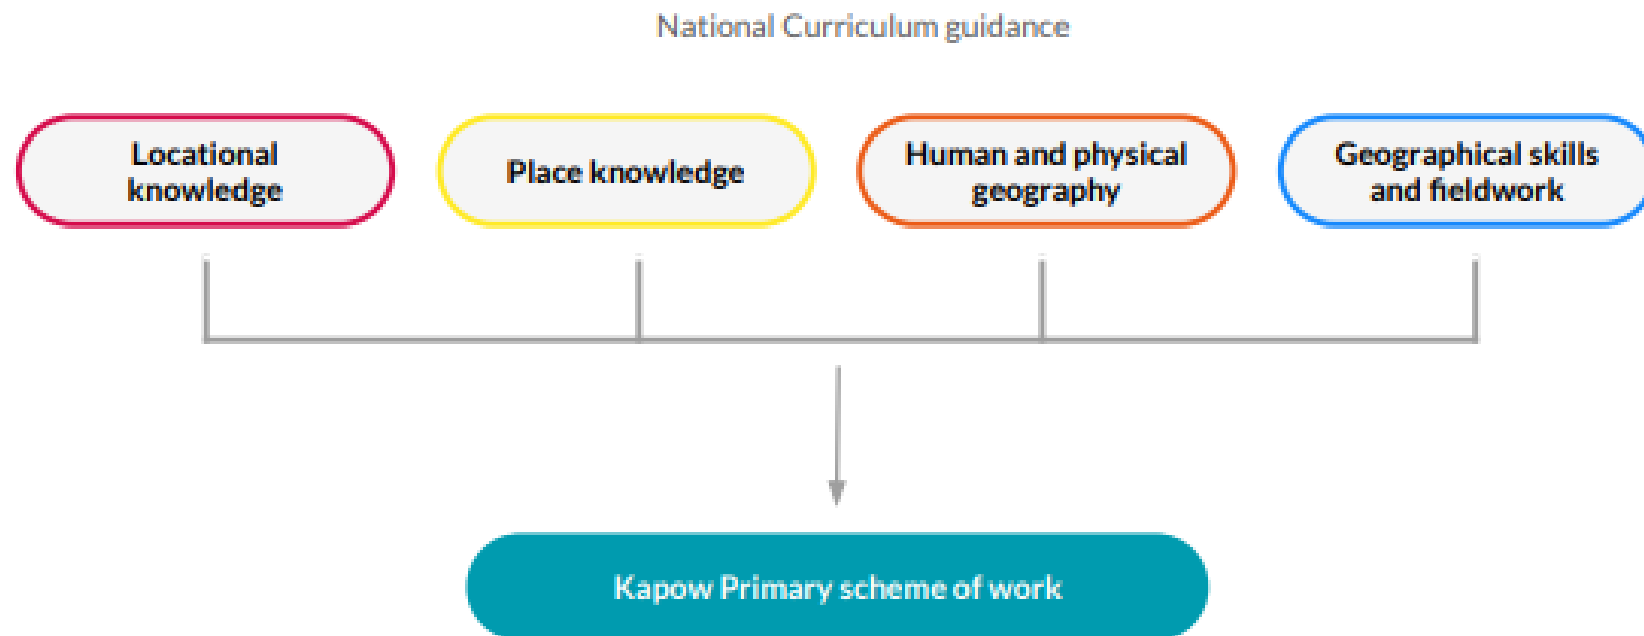

The expected impact of following the Kapow Primary Geography scheme of work is that children will:

- Compare and contrast human and physical features to describe and understand similarities and differences between various places in the UK, Europe and the Americas.
- Name, locate and understand where and why the physical elements of our world are located and how they interact, including processes over time relating to climate, biomes, natural disasters and the water cycle.
- Understand how humans use the land for economic and trading purposes, including how the distribution of natural resources has shaped this.
- Develop an appreciation for how humans are impacted by and have evolved around the physical geography surrounding them and how humans have had an impact on the environment, both positive and negative.
- Develop a sense of location and place around the UK and some areas of the wider world using the eight-points of a compass, four and six-figure grid references, symbols and keys on maps, globes, atlases, aerial photographs and digital mapping.
- Identify and understand how various elements of our globe create positioning, including latitude, longitude, the hemispheres, the tropics and how time zones work, including night and day.
- Present and answer their own geographical enquiries using planned and specifically chosen methodologies, collected data and digital technologies.

- Meet the 'Understanding the World' Early Learning Goals at the end of EYFS, and the end of key stage expectations outlined in the National curriculum for Geography by the end of Year 2 and Year 6.

Subject Leader - Miss Amber Sayer

How is the Geography scheme of work organised?

NB. Statements marked with an asterisk * are those which appear under more than one strand.

Topic	EYFS
Around the World	<ul style="list-style-type: none">• Explain some similarities and differences between life in this country and life in other countries, drawing on knowledge from stories, non-fiction texts e.g. Handa's Surprise.• Teach children about places in the world that contrast with locations they know well.• Explore the natural world around them, making observations (fieldwork) e.g. rubbings, observational drawings.• Draw information from a simple map e.g. Draw children's attention to the immediate environment, introducing and modelling new vocabulary where appropriate. Familiarise children with the name of the road, and or village/town/city the school is located in. Look at aerial views of the school setting, encouraging children to comment on what they notice, recognising buildings, open space, roads and other simple features.

EYFS: Reception

**Understanding the world;
Development matters and Early
Learning Goals**

Identifying land and water on a map or globe

Making observations about the characteristics of places (in stories, photographs or in the school grounds/local area).*

Development Matters

Draw information from a simple map.

Describe what they see, hear and feel whilst outside.

Recognise some environments that are different from the one in which they live.

Understand that some places are special to members of their community.

To know some vocabulary to describe different bodies of water, even if used inaccurately (sea/ocean, lake, river, pond).*

To know that usually water is represented in blue on a map or globe.

To know the name of their school and the place where they live.

To know some vocabulary to describe the characteristics of different places, even if used inaccurately (hill, field, building, road, house, old).*

Early Learning Goals

Describe their immediate environment using knowledge from observation, discussion, stories, non-fiction texts and maps

Year 1	Year 2	National curriculum - end of KS1 Pupils should be able to:
<p>Locating two of the world's seven continents on a world map.</p> <p>Locating two of the world's oceans (Atlantic Ocean and Pacific Ocean) on a world map.</p> <p>Showing on a map which continent they live in.</p>	<p>Locating all the world's seven continents on a world map.</p> <p>Locating the world's five oceans on a world map.</p> <p>Showing on a map the oceans nearest the continent they live in.</p>	
<p>To know the name of two continents (Europe and Asia).</p> <p>To know that a continent is a group of countries.</p> <p>To know that they live in the continent of Europe.</p> <p>To know that an ocean is a large body of water.</p> <p>To know the name of two of the world's oceans (Atlantic Ocean and Pacific Ocean).</p>	<p>To be able to name the seven continents of the world.</p> <p>To be able to name the five oceans of the world.</p>	<p>Name and locate the world's seven continents and five oceans</p>
<p>Locating the four countries of the United Kingdom (UK) on a map of this area.</p> <p>Showing on a map which country they live in and locating its capital city.</p>	<p>Locating the surrounding seas and oceans of the UK on a map of this area.</p> <p>Locating the capital cities of the four countries of the UK on a map of this area.</p> <p>Identifying characteristics (both human and physical) of the four capital cities of the UK.</p> <p>Showing on a map the city, town or village where they live in relation to their capital city.</p>	
<p>To know that the UK is short for 'United Kingdom'.</p> <p>To know that a country is a land or nation with its own government.</p> <p>To know that the United Kingdom is made up of four countries and their names.</p> <p>To know the name of the country they live in.</p>	<p>To know that a sea is a body of water that is smaller than an ocean."</p> <p>To know that there are four bodies of water surrounding the UK and to be able to name them.</p> <p>To name some characteristics of the four capital cities of the UK.</p> <p>To know the four capital cities of the UK.</p> <p>To know that a capital city is the city where a country's government is located.</p>	<p>Name, locate and identify characteristics of the four countries and capital cities of the United Kingdom and its surrounding seas</p>

Lower key stage 2	Upper key stage 2	National curriculum - end of KS2 Pupils should be able to:
<p>Locating some countries in Europe and North and South America using maps.</p> <p>Locating some major cities of the countries studied.</p> <p>Locating some key physical features in countries studied on a map including significant environmental regions.</p> <p>Locating some key human features in countries studied.</p> <p>Locating the world's most significant mountain ranges on a world map and identifying any patterns.</p> <p>Locating where the world's volcanoes are on a map and identifying the 'Ring of Fire'.</p> <p>Locating some of the world's most significant rivers and identifying any patterns.</p>	<p>Locating more countries in Europe and North and South America using maps.</p> <p>Locating major cities of the countries studied.</p> <p>Locating key physical features in countries studied on a map.</p> <p>Locating key human features in countries studied.</p> <p>Identifying significant environmental regions on a map.</p> <p>Using maps to show the distribution of the world's climate zones, biomes and vegetation belts.</p>	<p>Locate the world's countries, using maps to focus on Europe (including the location of Russia) and North and South America, concentrating on their environmental regions, key physical and human characteristics, countries, and major cities</p>
<p>To know where North and South America are on a world map.</p> <p>To know the names of some countries and major cities in Europe and North and South America.</p> <p>To know the names of some of the world's most significant mountain ranges.</p> <p>To know the names of some of the world's most significant rivers.</p> <p>To know that mountains, volcanoes and earthquakes largely occur at plate boundaries.</p> <p>To know that climate zones are areas of the world with similar climates.*</p> <p>To know the world's different climate zones (equatorial, tropical, hot desert, temperate and polar).*</p> <p>To know that biomes are areas of world with similar climates, vegetation and animals.*</p> <p>To know the world's biomes. *</p> <p>To know vegetation belts are areas of the world which are home to similar plant species.*</p>	<p>To know the name of many countries and major cities in Europe and North and South America.</p> <p>To know the location of key physical features in countries studied.</p> <p>To name and describe some of the world's vegetation belts (ice cape, tundra, coniferous forest, deciduous forest, evergreen forest, mixed forest, temperate grassland, tropical grassland, mediterranean, desert scrub, desert, highland).*</p>	

Lower key stage 2	Upper key stage 2	National curriculum - end of KS2 Pupils should be able to:
<p>Locating some counties in the UK (local to your school).</p> <p>Locating some cities in the UK (local to your school).</p> <p>Identifying key physical and human characteristics of counties, cities and/or geographical regions in the UK.</p> <p>Beginning to locate the twelve geographical regions of the UK.</p> <p>Identifying how topographical features studied have changed over time using examples.</p> <p>Describing how a locality has changed over time, giving examples of both physical and human features.</p>	<p>Locating many counties in the UK.</p> <p>Locating many cities in the UK.</p> <p>Confidently locating the twelve geographical regions of the UK.</p> <p>Identifying key physical and human characteristics of the geographical regions in the UK.</p> <p>Understanding how land-use has changed over time using examples.</p> <p>Explaining why a locality has changed over time, giving examples of both physical and human features.</p>	<p>Name and locate counties and cities of the United Kingdom, geographical regions and their identifying human and physical characteristics, key topographical features (including hills, mountains, coasts and rivers), and land-use patterns; and understand how some of these aspects have changed over time</p>
<p>To know the name of some counties in the UK (local to your school).</p> <p>To know the name of some cities in the UK (local to your school).</p> <p>To know the name of the county that they live in and their closest city.</p> <p>To begin to name the twelve geographical regions of the UK.</p> <p>To know the main types of land use.*</p> <p>To know some types of settlement.*</p>	<p>To know the name of many counties in the UK.</p> <p>To know the name of many cities in the UK.</p> <p>To confidently name the twelve geographical regions of the UK.</p> <p>To know that London and the South East regions have the largest population in the UK.</p>	

Lower key stage 2	Upper key stage 2	National curriculum - end of KS2 Pupils should be able to:
<p>Finding the position of the Equator and describing how this impacts our environmental regions.</p> <p>Finding lines of latitude and longitude on a globe and explaining why these are important.</p> <p>Identifying the position of the Tropics of Cancer and Capricorn and their significance.</p> <p>Identifying the position of the Northern and Southern hemispheres and explaining how they shape our seasons.</p> <p>Identifying the position and significance of both the Arctic and Antarctic Circle.</p>	<p>Identifying the location of the Prime/Greenwich Meridian and time zones (including day and night) and explaining its significance.</p> <p>Using longitude and latitude when referencing location in an atlas or on a globe.</p>	<p>Identify the position and significance of latitude, longitude, Equator, Northern Hemisphere, Southern Hemisphere, the Tropics of Cancer and Capricorn, Arctic and Antarctic Circle, the Prime/Greenwich Meridian and time zones (including day and night)</p>
<p>To know that countries near the Equator have less seasonal change than those near the poles.</p> <p>To know that the Equator is a line of latitude indicating the hottest places on Earth and splitting our globe into the Northern and Southern Hemispheres.</p> <p>To know lines of longitude are invisible lines on the globe that determine how far east or west a location is from the Prime Meridian.</p> <p>To know lines of latitude are invisible lines on the globe that determine how far north or south a location is from the Equator.</p> <p>To know the Tropics of Cancer and Capricorn are lines of latitude and mark the equatorial region; the countries with the hottest climates.</p> <p>To know the Northern and Southern hemisphere are 'halves' of the Earth, above and below our Equator and have alternate seasons to each other.</p> <p>To know the boundaries of the polar regions are marked by the invisible lines the Arctic and Antarctic circle.</p> <p>To know the patterns of daylight in the Arctic and Antarctic circle and the Equatorial regions.</p>	<p>To know the Prime/Greenwich Meridian is a line of longitude which goes through 0° and determines the start of the world's time zones.</p>	

EYFS: Reception

Understanding the world; Development matters and Early Learning Goals

Discussing how environments in stories and images are different to the environment they live in.

Development matters
Recognise some environments that are different from the one in which they live.

Recognise some similarities and differences between life in this country and life in other countries.

To know that places within this country can differ from each other. - coming soon!

Early Learning Goals
Explain some similarities and differences between life in this country and life in other countries, drawing on knowledge from stories, non-fiction texts and – when appropriate – maps.

To know that there are differences between places in this country and places in other countries. - coming soon!

Know some similarities and differences between the natural world around them and contrasting environments, drawing on their experiences and what has been read in class.

Year 1

Year 2

National curriculum - end of KS1
Pupils should be able to:

Naming some key similarities between their local area and a small area of a contrasting non-European country.

Naming some key differences between their local area and a small area of a contrasting non-European country.

Describing and beginning to explain some key similarities between their local area and a small area of a contrasting non-European country.

Describing and beginning to explain some key differences between their local area and a small area of a contrasting non-European country.

Describing what physical features may occur in a hot place in comparison to a cold place.

Understand geographical similarities and differences through studying the human and physical geography of a small area of the United Kingdom, and of a small area in a contrasting non-European country

To know that life elsewhere in the world is often different to ours.

To know that life elsewhere in the world often has similarities to ours.

To know some similarities and differences between their local area and a contrasting non-European country.

Lower key stage 2	Upper key stage 2	National curriculum - end of KS2 Pupils should be able to:
<p>Describing and beginning to explain similarities between two regions studied.</p> <p>Describing and beginning to explain differences between two regions studied.</p> <p>Describing how and why humans have responded in different ways to their local environments.</p> <p>Discussing how climates have an impact on trade, land use and settlement.</p> <p>Explaining what measures humans have taken in order to adapt to survive in cold places.</p> <p>Describing and explaining how people who live in a contrasting physical area may have different lives to people in the UK.</p>	<p>Describing and explaining similarities between two environmental regions studied.</p> <p>Describing and explaining differences between two environmental regions studied.</p> <p>Explaining how and why humans have responded in different ways to their local environments in two contrasting regions.</p> <p>Understanding how climates impact on trade, land use and settlement.</p> <p>Explaining how humans have used desert environments.</p> <p>Using maps to explore wider global trading routes.</p>	<p>Understand geographical similarities and differences through the study of human and physical geography of a region of the United Kingdom, a region in a European country, and a region within North or South America</p>
<p>To know the negative effects of living near a volcano.</p> <p>To know the positive effects of living near a volcano.</p> <p>To know the negative effects an earthquake can have on a community.</p> <p>To know ways in which communities respond to earthquakes.</p>	<p>To know some similarities and differences between the UK and a European mountain region.</p> <p>To know why tourists visit mountain regions.</p>	

EYFS: Reception

Understanding the world;
Development matters and Early Learning Goals

Observing weather across the seasons.
Observing and discussing the effect the changing seasons have on the world around them.
Beginning to use the names of the seasons in the correct context.
Making observations about the features of places (in stories, photographs or in the school grounds/local area).
Making observations about the characteristics of places (in stories, photographs or in the school grounds/local area).*

Development matters
Describe what they see, hear and feel whilst outside.

Explore the natural world around them.

Understand the effect of changing seasons on the natural world around them.

To know that the terms Spring, Summer, Autumn and Winter are used to describe the season.
To know some of the key characteristics of each season.
To know that there are four seasons in a year marked by certain weather conditions.
To know some vocabulary to describe different bodies of water, even if used inaccurately (sea/ocean, lake, river, pond)*
To know some vocabulary to describe the characteristics of different places, even if used inaccurately (hill, field, building, road, house, old).*

Early Learning Goals
Explore the natural world around them, making observations and drawing pictures of animals and plants;

Understand some important processes and changes in the natural world around them, including the seasons and changing states of matter.

Know some similarities and differences between the natural world around them and contrasting environments, drawing on their experiences and what has been read in class;

Year 1	Year 2	National curriculum - end of KS1 Pupils should be able to:
<p>Describing how the weather changes with each season in the UK.</p> <p>Describing the daily weather patterns in their locality.</p> <p>Confidently using the vocabulary 'season' and 'weather'.</p> <p>To know the four seasons of the UK.</p> <p>To know that 'weather' refers to the conditions outside at a particular time.</p> <p>To know that different parts of the UK often experience different weather.</p> <p>To know that a weather forecast is when someone tries to predict what the weather will be like in the near future.</p> <p>To know that weather conditions can be measured and recorded.</p>	<p>Locating some hot and cold areas of the world on a world map.</p> <p>Locating the Equator and North and South Poles on a world map.</p> <p>Locating hot and cold areas of the world in relation to the Equator and the North and South poles.</p> <p>To know that the Equator is an imaginary line around the middle of the Earth.</p> <p>To know that, because it is the widest part of the Earth, the Equator is much closer to the sun than the North and South poles.</p> <p>To know that the North Pole is the northernmost point of the Earth and the South Pole is the southernmost point of the Earth.</p> <p>To know that different parts of the world experience different weather conditions and that these are often caused by the location of the place.</p>	<p>Identify seasonal and daily weather patterns in the United Kingdom and the location of hot and cold areas of the world in relation to the Equator and the North and South Poles</p>
<p>Recognising some physical features in their locality.</p> <p>To know that physical features means any feature of an area that is on the Earth naturally.</p>	<p>Describing the key physical features of a coast using subject specific vocabulary.</p> <p>To know that coasts (and other physical features) change over time.</p> <p>To know some key physical features of the UK.</p>	<p>Use basic geographical vocabulary to refer to key physical features, including: beach, cliff, coast, forest, hill, mountain, sea, ocean, river, soil, valley, vegetation, season and weather</p>
<p>Recognising some human features in their locality.</p> <p>To know that human features means any feature of an area that was made or built by humans.</p>	<p>Describing and understanding the differences between a city, town and village.</p> <p>Describing the key human features of a coastal town using subject specific vocabulary.</p> <p>To know that a sea is a body of water that is smaller than an ocean.</p> <p>To know that human features change over time.</p> <p>To know some key human features of the UK.</p>	<p>Use basic geographical vocabulary to refer to key human features, including: city, town, village, factory, farm, house, office, port, harbour and shop</p>

Lower key stage 2	Upper key stage 2	National curriculum - end of KS2 Pupils should be able to:
<p>Mapping and labeling the seven biomes on a world map.</p> <p>Understanding some of the causes of climate change.</p> <p>Describing how physical features, such as mountains and rivers are formed, and why volcanoes and earthquakes occur.</p> <p>Describing where volcanoes, earthquakes and mountains are located globally.</p> <p>Describing and explaining how physical features such as rivers, mountains, volcanoes and earthquakes have had an impact upon the surrounding landscape and communities.</p> <p>Describing how humans use water in a variety of ways.</p>	<p>Describing and understanding the key aspects of the six biomes.</p> <p>Describing and understanding the key aspects of the six climate zones.</p> <p>Understanding some of the impacts and causes of climate change.</p> <p>Describing and understanding the key aspects and distribution of the vegetation belts in relation to the six biomes, climate and weather.</p> <p>Giving examples of alternative viewpoints and solutions regarding an environmental issue and explaining its links to climate change.</p>	
<p>To know that the water cycle is the processes and stores which move water around our Earth and to be able to name these.</p> <p>To know the courses and key features of a river.</p> <p>To know the different types of mountains and volcanoes and how they are formed.</p> <p>To know that an earthquake is the intense shaking of the ground.</p> <p>To know that a biome is a region of the globe sharing a similar climate, landscape, vegetation and wildlife.*</p> <p>To know the world's biomes.*</p> <p>To know that the hottest biomes are found between the Tropics of Cancer and Capricorn.</p> <p>To know that climate zones are areas of the world with similar climates.*</p> <p>To know the world's different climate zones.*</p> <p>To know that climates can influence the foods able to grow.</p>	<p>To know vegetation belts are areas of the world that are home to similar plant species.*</p> <p>To name and describe some of the world's vegetation belts.</p> <p>To know why the ocean is important.</p>	<p>Describe and understand key aspects of:</p> <p>Physical geography, including: climate zones, biomes and vegetation belts, rivers, mountains, volcanoes and earthquakes, and the water cycle</p>

Lower key stage 2	Upper key stage 2	National curriculum - end of KS2 Pupils should be able to:
<p>Describing and understanding types of settlement and land use.</p> <p>Explaining why a settlement and community has grown in a particular location.</p> <p>Explaining why different locations have different human features.</p> <p>Explaining why people might prefer to live in an urban or rural place.</p> <p>Describing how humans can impact the environment both positively and negatively, using examples.</p>	<p>Describing and understanding economic activity including trade links.</p> <p>Suggesting reasons why the global population has grown significantly in the last 70 years.</p> <p>Describing the 'push' and 'pull' factors that people may consider when migrating.</p> <p>Understanding the distribution of natural resources both globally and within a specific region or country studied.</p> <p>Recognising geographical issues affecting people in different places and environments.</p> <p>Describing and explaining how humans can impact the environment both positively and negatively, using examples.</p>	
<p>To know the main types of land use.*</p> <p>To know the different types of settlement.*</p> <p>To know water is used by humans in a variety of ways.</p> <p>To know an urban place is somewhere near a town or city.</p> <p>To know a rural place is somewhere near the countryside.</p> <p>To know that a natural resource is something that people can use which comes from the natural environment.</p> <p>To know the threats to the rainforest both on a local and global scale.</p> <p>To know that fair trading is the process of ensuring workers are paid a fair price, have safe working conditions and are treated with respect and equality.</p> <p>To know the UK grows food locally and imports food from other countries.</p>	<p>To know the global population has grown significantly since the 1950s.</p> <p>To know which factors are considered before people build settlements.</p> <p>To know migration is the movement of people from one country to another.</p> <p>To know that natural resources can be used to make energy.</p> <p>To know some positive impacts of humans on the environment.</p> <p>To know some negative impacts of humans on the environment.</p>	<p>Describe and understand key aspects of:</p> <p>Human geography, including: types of settlement and land use, economic activity including trade links, and the distribution of natural resources including energy, food, minerals and water</p>

Through fieldwork studies in each unit, pupils carry out geographical enquiries using our enquiry cycle. These fieldwork enquiries combine substantive knowledge from the other strands: Locational knowledge, Place knowledge, Human and physical geography and allow pupils to understand the discipline of Geography and how this substantive knowledge was formed.

	EYFS: Reception	Year 1	Year 2	National curriculum - end of KS1 Pupils should be able to:
Question	Ask questions about the world around them.		Recognising there are different ways to answer a question.	Use simple fieldwork and observational skills to study the geography of their school and its grounds and the key human and physical features of its surrounding environment.
Observe	Commenting on the features they see in their school and school grounds.		Discussing the features they see in the area surrounding their school when on a walk. Asking and answering simple questions about human and physical features of the area surrounding their school grounds.	
Measure	Answering simple questions, guided by the teacher.	Asking and answering simple questions about the features of their school and school grounds.	Collecting quantitative data through a small survey of the local area/school to answer an enquiry question.	
Record	Creating some of the features they notice in their school and school grounds.	Drawing some of the features they notice in their school and school grounds in correct relation to each other on a sketch map.	Classifying the features they notice into human and physical with teacher support. Taking digital photographs of geographical features in the locality. Making digital audio recordings when interviewing someone.	
Present	Expressing their likes and dislikes about a specific place and its features, beginning to explain their reasoning.	Using a simple recording technique to express their feelings about a specific place and explaining why they like/dislike some of its features.	Presenting data in simple tally charts or pictograms and commenting on what the data shows. Asking and answering simple questions about data.	

	Lower key stage 2	Upper key stage 2	National curriculum - end of KS2 Pupils should be able to:
Question	Beginning to choose the best approach to answer an enquiry question.	Developing their own enquiry questions. Choosing the best approach to answering an enquiry question.	Use fieldwork to observe, measure, record and present the human and physical features in the local area using a range of methods, including sketch maps, plans and graphs, and digital technologies.
Observe	Mapping land use in a small local area using maps and plans. Making a plan for how they wish to collect data to answer an enquiry based question, with the support of a teacher. Asking and answering one- step and two-step geographical questions. Observing, recording, and naming geographical features in their local environments.	Making sketch maps of areas studied including labels and keys where necessary. Making an independent or collaborative plan of how they wish to collect data to answer an enquiry based question.	
Measure	Using simple sampling techniques appropriately. Making digital audio recordings for a specific purpose. Designing a questionnaire / interviews to collect quantitative fieldwork data.	Selecting appropriate methods for data collection. Designing interviews/questionnaires to collect qualitative data. Beginning to use standard field sampling techniques appropriately.	
Record	Taking digital photos and labeling or captioning them. Making annotated sketches, field drawings and freehand maps to record observations during fieldwork. Beginning to use a simplified Likert Scale to record their judgements of environmental quality. Using a questionnaire/interviews to collect qualitative fieldwork data.	Using GIS (Geographical Information Systems) to plot data sets (e.g prevalence of crime in certain areas) onto base maps which can then be analysed. Using a simplified Likert Scale to record their judgements of environmental quality. Conducting interviews/questionnaires to collect qualitative data. Interpreting and using real-time/live data. To identify and mitigate potential risks during fieldwork.	
Present	Presenting data using plans, freehand sketch maps, annotated drawings, graphs, presentations, writing and digital technologies when communicating geographical information. Suggesting different ways that a locality could be changed and improved. Finding answers to geographical questions through data collection. Analysing and presenting quantitative data in charts and graphs.	Deciding how to present data using plans, freehand sketch maps, annotated drawings, graphs, presentations, writing at length and digital technologies when communicating geographical information. Drawing conclusions about an enquiry using findings from fieldwork to support your reasonings. Evaluating evidence collected and suggesting ways to improve this. Analysing quantitative data in pie charts, line graphs and graphs with two variables.	

EYFS: Reception

**Understanding the world;
Development matters and Early
Learning Goals**

Ask questions about the world around them.

Commenting on the features they see in their school and school grounds.

Answering simple questions, guided by the teacher.

Drawing some of the features they notice in their school and school grounds.

Expressing their likes and dislikes about a specific place and its features, beginning to explain their reasoning.

Beginning to look at and talk about maps (real or imaginary) in stories, non-fiction books, atlases and on globes.

Beginning to use modelled directional vocabulary when describing features in the surrounding environment.

Recognising features on maps (real or imaginary).

Draw real or imaginary maps even if features are indistinguishable.

Development matters
Explore the natural world around them.

Describe what they see, hear and feel whilst outside.

Understand that some places are special to members of their community

Draw information from a simple map.

Early Learning Goals
Describe their immediate environment using knowledge from observation, discussion, stories, non-fiction texts and maps.

To know that a map is a picture of a place.

To know some vocabulary to describe directions, even if used inaccurately (e.g near, far, next to, close, behind).

Explain some similarities and differences between life in this country and life in other countries, drawing on knowledge from stories, non-fiction texts and – when appropriate – maps.

Year 1	Year 2	National curriculum - end of KS1 Pupils should be able to:
<p>Using an atlas to locate the UK.</p> <p>Using a map of the UK to locate the four countries.</p> <p>Beginning to use an atlas to locate the four capital cities of the UK.</p> <p>Using a world map and globe to locate two of the world's seven continents (Europe and Asia).</p> <p>Using an atlas to locate the Atlantic Ocean and Pacific Ocean.</p>	<p>Recognising why maps need a title.</p> <p>Using an atlas to locate the four capital cities of the UK.</p> <p>Using a world map, globe and atlas to locate all the world's seven continents.</p> <p>Using a world map, globe and atlas to locate the world's five oceans.</p>	<p>Use world maps, atlases and globes to identify the United Kingdom and its countries, as well as the countries, continents and oceans studied at this key stage</p>
<p>Using directional language to describe the location of objects in the classroom and playground.</p> <p>Using directional language to describe features on a map in relation to other features (real or imaginary).</p> <p>Responding to instructions using directional language to follow routes.</p> <p>Beginning to use the compass points (N, S, E, W) to describe the location of features on a map.</p>	<p>Using locational language and the compass points (N, S, E, W) to describe the location of features on a map.</p> <p>Using locational language and the compass points (N, S, E, W) to describe the route on a map.</p> <p>Using locational language and the compass points (N, S, E, W) to plan a route in the playground or school grounds.</p> <p>Using a map to follow a prepared route.</p>	<p>Use simple compass directions (North, South, East and West) and locational and directional language, to describe the location of features and routes on a map</p>
<p>Recognising local landmarks on aerial photographs .</p> <p>Recognising basic human features on aerial photographs.</p> <p>Recognising basic physical features on aerial photographs.</p> <p>Drawing freehand maps (of real or imaginary places) using simple pictures or symbols.</p> <p>Drawing a simple sketch map of the classroom and playground using simple pictures, colours or symbols to represent features.</p> <p>Adding labels to sketch maps.</p> <p>Using simple picture maps and plans to move around the school.</p>	<p>Recognising landmarks of a city studied on aerial photographs and plan perspectives.</p> <p>Recognising human features on aerial photographs and plan perspectives.</p> <p>Recognising physical features on aerial photographs and plan perspectives.</p> <p>Drawing a map and using class agreed symbols to make a simple key.</p> <p>Drawing a simple sketch map of the playground or school grounds using symbols to represent human and physical features.</p> <p>Finding a given OS symbol on a map with support.</p> <p>Beginning to draw objects to scale (e.g show the school playground is smaller than the school or school field).</p> <p>Using an aerial photograph to draw a simple sketch map using basic symbols for a key.</p>	<p>Use aerial photographs and plan perspectives to recognise landmarks and basic human and physical features; devise a simple map; and use and construct basic symbols in a key</p>

Lower key stage 2	Upper key stage 2	National curriculum - end of KS2 Pupils should be able to:
<p>Beginning to use maps at more than one scale.</p> <p>Using atlases, maps, globes, satellite images and beginning to use digital mapping to locate countries studied .</p> <p>Using atlases, maps, globes and beginning to use digital mapping to recognise and describe physical features and human features in countries studied .</p> <p>Using the scale bar on a map to estimate distances.</p> <p>Finding countries and features of countries in an atlas using contents and index.</p> <p>Zooming in and out of a digital map.</p>	<p>Confidently using and understanding maps at more than one scale.</p> <p>Using atlases, maps, globes and digital mapping to locate countries studied.</p> <p>Using atlases, maps, globes and digital mapping to describe and explain physical and human features in countries studied.</p> <p>Identifying, analysing and asking questions about distributions and relationships between features using maps (e.g settlement distribution).</p> <p>Using the scale bar on a map to calculate distances.</p> <p>Recognising an increasing range of Ordnance Survey symbols on maps and locating features using six-figure grid references.</p> <p>Recognising the difference between Ordnance Survey and other maps and when it is most appropriate to use each.</p> <p>Beginning to use thematic maps to recognise and describe human and physical features studied.</p> <p>Using models and maps to talk about contours and slopes.</p> <p>Selecting a map for a specific purpose.</p>	<p>Use maps, atlases, globes and digital/computer mapping to locate countries and describe features studied</p>
<p>Beginning to use the key on an OS map to name and recognise key physical and human features in regions studied.</p> <p>Accurately using 4-figure grid references to locate features on a map in regions studied.</p> <p>Beginning to locate features using the 8 points of a compass.</p> <p>Using a simple key on their own map to show an example of both physical and human features.</p> <p>Following a route on a map with some accuracy.</p> <p>Saying which directions are N, S, E, W on an OS map.</p> <p>Making and using a simple route on a map.</p> <p>Labelling some features on an aerial photograph and then locating these on an OS map of the same locality and scale in regions studied.</p>	<p>Confidently using the key on an OS map to name and recognise key physical and human features in regions studied.</p> <p>Accurately using 4 and 6-figure Grid References to locate features on a map in regions studied.</p> <p>Confidently locating features using the 8 points of a compass.</p> <p>Following a short pre-prepared route on an OS map.</p> <p>Identifying the 8 compass points on an OS map.</p> <p>Planning a journey to another part of the world using six figure grid references and the eight points of a compass.</p>	<p>Use the eight points of a compass, four and six-figure grid references, symbols and key (including the use of Ordnance Survey maps) to build their knowledge of the United Kingdom and the wider world</p>

Year 1

- To know that an aerial photograph is a photograph taken from the air above.
- To know that atlases give information about the world and that a map tells us information about a place.
- To know that a map is a picture of a place, usually drawn from above.
- To know that symbols are often used on maps to represent features.
- To know simple directional language (e.g near, far, up, down, left, right, forwards, backwards).
- To know what a sketch map is.

Year 2

- To know that a globe is a spherical model of the Earth.
- To begin to recognise world maps as a flattened globe.
- To know that a compass is an instrument we can use to find which direction is north.
- To know which direction is N, S, E, W on a map.
- To know that maps need a title and purpose.
- To know that maps need a key to explain what the symbols and colours represent.
- To know that an interview can be a way to find out people's views about their area.
- To know that a tally chart is a way of collecting data quickly.
- To know that a pictogram is a chart that uses pictures to show data.

Lower key stage 2

To understand that a scale shows how much smaller a map is compared to real life.

To recognise world maps as a flattened globe.

To know that an OS (Ordnance survey) map is used for personal use and organisations use it for housing projects, planning the natural environment and public transport and for security purposes.

To know that an OS map shows human and physical features as symbols.

To know that grid references help us locate a particular square on a map.

To know the eight points of a compass are north, south, east, west, north-east, south-east, north-west, south-west.

To know the main types of land use (agricultural, residential, recreational, commercial, industrial and transportation)

To know an enquiry-based question has an open-ended answer found by research.

To know how to use various simple sampling techniques.

To know what a questionnaire and an interview are.

To know that quantitative data involves numerical facts and figures and is often objective.

To know that an annotated drawing or sketch map is hand drawn and gives a rough idea of features of an area without having to be completely accurate.

To know a Likert scale is used to record people's feelings and attitudes.

To know that qualitative data involves opinions, thoughts and feelings and is often subjective.

To know what a bar chart, pictogram and table are and when to use which one best to represent data.

Upper key stage 2

To know that contours on a map show height and slope.

To know that qualitative data involves qualities, characteristics and is largely opinion based and subjective.*

To know that GIS is a digital system that creates and manages maps, used to support analysis for enquiries.

To know that a pie chart can represent a fraction or percentage of a whole set of data.

To know a line graph can represent variables over time.

To be aware of some issues in the local area.

To know what a range of data collection methods look like.

To know how to use a range of data collection methods.

Peace	Friendship	Respect	Trust	Perseverance
				
<p>Using knowledge to find similarities and differences all over the world.</p>	<p>Understand our collective responsibility for the world and people around us.</p>	<p>Respect the ideas of others.</p>	<p>Trust that others will make choices to benefit our world.</p>	<p>Keep trying when skills are challenging.</p>
<p>Reflect on our personal responsibility to care for the world.</p>	<p>Working together and collaborating to develop knowledge and understanding.</p>	<p>Understand the importance of our own responsibility to look after the world.</p>	<p>Trust in myself that I can achieve and make a difference.</p>	<p>Encourage others to make choices that will benefit our world.</p>
<p>Develop the ability to tackle global issues.</p>	<p>Understand how people live in different situations over the world.</p>	<p>Respect the natural world and of other cultures across the world.</p>	<p>Trust that my knowledge will give me confidence to inspire others.</p>	<p>Aspire to be a fantastic geographer.</p>
